

PERFLUOROPOLYETHER PRIMARY BROMIDES AND IODIDES**ABSTRACT**

A perfluoropolyether and a composition comprising the perfluoropolyether are provided in which the perfluoropolyether comprises
5 at least one bromine or iodine atom at the primary position of the perfluoropolyether. Also provided is a process for producing the composition in which the process comprises contacting a perfluoropolyether acid fluoride moiety with a metal bromide or metal iodide or a suitable polyether secondary iodide under a condition sufficient
10 to effect the production of a perfluoropolyether comprising at least one bromine or iodine at the primary position.
